Author information and declarations

Author order

1. Zhi Chen, first author. Email: zhichen1@link.cuhk.edu.cn. ORCID: https://orcid.org/0009-0001-0072-5576. Academic title: MSc student in Bioinformatics.

2. Teng Qi, corresponding author. Email: tengqi@link.cuhk.edu.cn. ORCID: https://orcid.org/0009-0007-7648-4776. Academic title: MSc student in Bioinformatics.

Affiliation for both authors: School of Medicine, The Chinese University of Hong Kong, Shenzhen, Shenzhen 518172, China.

Correspondence: Teng Qi, MED Start-up Building, 2001 Longxiang Boulevard, Longgang District, Shenzhen 518172, China.

First-author biography

Zhi Chen is an MSc student in Bioinformatics at The Chinese University of Hong Kong, Shenzhen. His research interests include integrated multi-omics analysis, clinical cancer research and the tumor microenvironment. He holds a BSc in Biomedical Sciences from Queen Mary University of London and an MB in Clinical Medicine from Nanchang University.

Author contributions

Z.C.: Conceptualization, Data curation, Formal analysis, Investigation, Methodology, Software, Visualization, Writing - original draft. T.Q.: Conceptualization, Methodology, Project administration, Validation, Writing - review and editing.

Declarations

Ethics: This secondary study used publicly available, de-identified human transcriptomic datasets. It involved no participant recruitment, intervention or collection of new specimens. No additional ethics approval was required. Ethics and consent procedures for the source studies are reported in the original publications.

Consent for publication: Not applicable; no identifiable participant information was used.

Funding: This study received no funding.

Competing interests: The authors declare no competing interests.

Acknowledgements: None.

Originality: The work is original and is not under consideration by another journal. Both authors confirmed the scientific content and author contributions in the project record.

Generative AI: OpenAI Codex was used for code drafting, workflow documentation, language editing and development of quality-control checks, as described in the manuscript. All analyses were executed locally against fixed inputs, scientific interpretation and final decisions remained author-led, and the authors remain responsible for the scripts, results, interpretations and final text. No AI system is an author.
